

In the Specification:

Please replace paragraph [0029] with the replacement paragraph set forth below.

[0029] The catalyst comprises a metal other than a metal from Groups 4(b), 5(b) and 6(b) of the Periodic Table of the Elements. See, for example, *Handbook of Chemistry and Physics*, 64th Edition, Periodic Table of the Elements, Inside Front Cover, which is fully incorporated herein by this reference. A suitable metal includes, but is not limited to cobalt, copper, iron, nickel, silver, and any combination thereof. Further examples of suitable metals include those from Group 1(b) and Group 8 of the Periodic Table of the Elements. Preferably, the catalyst, or the metal thereof, is substantially insoluble in the composition.
